EDUCATION

De La Salle University Dasmariñas

2023 – 2027

Bachelor of Science in Computer Science, Major in Intelligent Systems (GPA: 3.78/4.0)

Dasmariñas, Cavite

SKILLS

Languages : Python, TypeScript, JavaScript, Java, HTML5, CSS3, SQL, C#

Technologies : React, FastAPI, Firebase, Capacitor.js, Spring Boot, MySQL, Leaflet, OpenLayers, Recharts, MediaPipe, ONNX Runtime Web, Docker, Git, GitHub, Progressive Web Apps (PWA), Dexie.js, IndexedDB, Tailwind CSS, Bootstrap, Vite, Gradle, Pandas, Scikit-learn, Google Earth Engine API, Jupyter Notebooks, ASP.NET Core, Supabase

EXPERIENCE

RE Lodronio Builders Inc.

July 2026 – Aug. 2026

Software Engineer Intern

Hybrid

- Developed a corporate website showcasing project portfolios for an engineering company.
- Engineered a secure database application featuring an internal administrative portal.
- Integrated four core modules: employee records, automated payroll, digital voucher tracking, and real-time dashboards.

Eskwelabs

Jan. 2025 – Mar. 2025

UI/UX Intern

Remote

- Designed and optimized the UI/UX of the company's main landing page to improve user engagement and visual consistency.
- Applied analytical skills to identify design gaps and implement layout improvements using Figma/CSS.

Center for Social Innovation Foundation Inc.

Jan. 2023 – Jan. 2024

Software Developer Intern

Hybrid

- Implemented and managed a Customer Relationship Management (CRM) system integrated into the landing page to streamline data handling.
- Developed interactive website prototypes to support the organization's digital transformation initiatives.

PROJECTS

Cavite Agri-Watch – 30-Day Early Warning Dashboard

2026 – 2027

- Developed a web-GIS platform to monitor and predict crop stress in Cavite, Philippines, using satellite data.
- Built the interactive map dashboard using React, TypeScript, and OpenLayers.
- Integrated Google Earth Engine API with a FastAPI backend for automated satellite imagery extraction.
- Implemented a Random Forest machine learning model in Python to forecast crop risk levels.

Lifeline – Emergency Reporting App

2024 – 2025

- Designed an offline-first Progressive Web App (PWA) for community emergency reporting.
- Created maps and localized incident reporting overlays using React and Leaflet.
- Implemented local offline storage using Dexie.js and automated background syncing with Firebase.
- Integrated client-side machine learning inference in the browser using ONNX Runtime Web.

LabPrep – Mobile Application

2026

- Developed a cross-platform mobile application and admin panel to guide patients through pre-lab test instructions.
- Built the mobile frontend using React and packaged it for Android using Capacitor.js.
- Utilized Firebase Auth and Firestore for secure databases and role-based access.

EXTRACURRICULAR ACTIVITIES

Codespace Bootcamp – Appointed Leader

- Completed training in web development, mastering front-end and back-end technologies including HTML5, JavaScript, CSS, Node.js, and MongoDB.
- Built and deployed a capstone project, showcasing practical skills in full-stack development and teamwork.

Hackathons & Competitions

- **Young Software Engineers' Society (YSES):** Developed a small-scale website that acts as a medium of contact between parties.
- **Software Championing Students' Wellbeing:** Developed a high-fidelity prototype website around Students' Wellbeing.
- **CSmash IT – Codelympics 2024:** Developed a design prototype replacement of Student Portal DLSU-D.
